## Topic 11 Sources of Information

- a. Legal Considerations
- b. Forms of Information
- c. Government Sources of Information
- d. Private Sources of Information

## Assessment

The University of Akron and specifically the Fire Protection program assesses student learning at several levels. The goal of these assessment activities is to improve student learning. As a student in this course, you will participate in various assessment activities. Grades and work samples may be selected to gather learning outcome data to be measured and tracked over several years. Student names or indicators are not used in data analysis. Students have an active role in course and program assessment projects. Generated data will direct any changes made in the curriculum which is
